

- I. Right Hemisphere Function and Deficits**
- Right Hemisphere and Verbal Communication:
Conceptual, Methodological, and Clinical Issues 1
Yves Joanette and Pierre Goulet
- The Effects of Visual and Inferential Complexity on the
Picture Descriptions of Non-Brain-Damaged and Right-
Hemisphere-Damaged Adults 25
Penelope S. Myers and Robert H. Brookshire
- Categorization Skills in Right Hemisphere Brain Damage
for Common and Goal-Derived Categories 35
*Monica Strauss Hough, Mary Jon Pabst,
and Salvatore DeMarco*
- Verbal Learning with the Right Hemisphere 53
*Pelagie M. Beeson, Steven Z. Rapcsak, Alan B. Rubens,
and Kathryn A. Bayles*
- Analysis of First-Encounter Conversations of
Right-Hemisphere-Damaged Adults 67
*Mary R. T. Kennedy, Edythe A. Strand, Wendy Burton,
and Connie Peterson*
- II. Attention Deficit: Neurodiagnostic Techniques
and Aphasia**
- A Topographic Event-Related Potential Analysis of the
Attention Deficit for Auditory Processing in Aphasia 81
Richard K. Peach, Scott S. Rubin, and Marilyn Newhoff
- Preliminary Investigations Into the Effects of Changing
the Attentional Target on Left Hemisphere Function
in Aphasic Patients 97
Marilyn Selinger and Thomas E. Prescott
- III. Psychometric Measurement, Assessment, and Evaluation**
- Duke Prognosis Profile Worksheet: Inter- and Intraobserver
Reliability 107
*Jennifer Horner, Mary Ann Eller, Deborah V. Dawson,
and Frances G. Buoyer*
